

# 李行 | 肿瘤医学事务 · 转化医学 · 临床证据生成

肺癌转化医学 / 生物标志物研究 / 专家洞察与医学策略

具备6年以上肿瘤医学事务与转化研究经验，聚焦肺癌靶向治疗、免疫治疗、耐药机制及液体活检。擅长在 I-II 期临床试验及 IIT 中开展生物标志物研究，完成临床与分子数据挖掘、结果解读和成果发表；能够识别肿瘤精准诊疗中的未满足需求，并通过专家沟通和医学教育推动临床证据传播。

家中心的多中心研究管理经验

## 核心能力

Core Capabilities

### 转化研究与伴随诊断挖掘

整合临床数据、多组学检测数据挖掘优势人群。

### 医学策略与专家洞察

结合指南、研究进展和专家反馈识别证据缺口。

### 产品证据生成与成果转化

通过IIT及真实世界研究获取产品临床价值证据。

### 多中心研究与项目管理

管理中心、样本、随访、数据质量和第三方交付。

## 工作经历

Research and Work Experience

### 厦门艾德生物医药有限公司 | 医学科学家 | 2023.08 - 至今 | 汇报线：CMO

- 医学策略与研究规划：**统筹公司肺癌领域医学事务，制定年度医学策略及转化研究规划，围绕肺癌全病程未满足需求开展诊断和生物标志物研究。
- KOL管理与专家洞察：**建立并维护核心肺癌KOL网络，通过专家拜访、顾问会及研究者会议收集临床需求和证据缺口，并转化为医学策略和研究方向。
- 产品证据生成：**基于临床需求及产品证据缺口，主导IIT和真实世界研究设计，支持产品注册前关键临床证据积累及上市后应用场景拓展。
- 学术进展与医学解读：**跟踪ELCC、ASCO、WCLC、ESMO等国际会议，以及重要临床和多组学研究进展，输出医学解读、竞争情报及专家沟通材料。
- 多中心研究管理：**主导Protocol、CRF和SAP撰写，负责多中心研究及CRO、第三方管理，统筹中心启动、患者入组、样本随访、数据质量、医学答疑及问题解决。

### 至本医疗（上海）股份有限公司 | MSL经理 | 2021.03-2023.08汇报线：高级医学总监

- 区域医学事务管理：**负责上海、江苏、浙江区域肿瘤医学事务及KOL管理，制定区域专家覆盖和医学沟通计划。
- 临床洞察与专家沟通：**通过专家拜访、病例讨论及学术会议收集临床需求、检测应用问题和专家反馈，为医学策略及产品优化提供支持。
- 科研合作与项目推进：**支持区域科研项目的立项讨论、方案优化、中心沟通和执行跟进，推动研究合作落地。
- 内部医学支持：**为销售、产品及市场团队提供疾病领域、检测技术和临床证据培训，提升跨部门医学协作效率。

### 上海睿昂基因科技股份有限公司 | 医学顾问 | 2020.01-2021.03汇报线：医学总监

- 区域KOL医学支持：**负责浙江、安徽、江西等区域专家维护和医学沟通，建立区域临床合作基础。
- 临床需求与项目设计：**收集临床检测需求和科研合作意向，参与科研项目设计、病例与样本信息整理及项目进度跟进。
- 项目协调与问题解决：**协调研究者与内部团队推进项目执行，处理检测应用及研究过程中的医学问题。
- 销售培训与科学沟通：**定期开展疾病领域、检测技术和临床应用培训，支持销售团队准确传递产品医学信息。

Selected Project and Publications

### 代表项目：驱动基因突变NSCLC MRD全国多中心转化研究

基于驱动基因突变作为肺癌发生发展的主干分子事件，探索驱动基因导向的液体活检用于术后复发监测和MRD评估的可行性。联合全国14家临床中心开展多中心研究，统筹研究设计、中心入组、样本检测、随访及数据分析，为公司MRD产品上市前注册积累关键临床证据；研究中中期结果获ESMO Asia 2025口头汇报。

# Li Xing | Medical Affairs · Translational Medicine · Clinical Evidence Generation

Lung Cancer Translational Medicine / Biomarker Research / Expert Insights & Medical Strategy

6+ years of experience in oncology Medical Affairs and translational research, focused on lung cancer targeted therapy, immunotherapy, resistance mechanisms and liquid biopsy. Experienced in biomarker research within Phase I–II trials and investigator-initiated studies (IITs), including clinical and molecular data mining, result interpretation and publication. Able to identify unmet needs in precision oncology and support evidence dissemination through expert engagement and medical education.

sites managed in multicenter studies

## Core Capabilities

### Translational Research & Companion Diagnostics

Integrate clinical and multi-omics testing data to identify responder populations.

### Medical Strategy & Expert Insights

Identify evidence gaps through guidelines, research updates and expert feedback.

### Product Evidence Generation & Translation

Generate product clinical value evidence through IITs and real-world studies.

### Multicenter Study & Project Management

Manage sites, samples, follow-up, data quality and vendor deliverables.

## Work Experience

### Amoy Diagnostics Co., Ltd. | Medical Scientist | Aug 2023–Present | Reports to CMO

- Medical Strategy & Research Planning:** Led lung cancer Medical Affairs, annual medical strategy and translational research planning; initiated diagnostic and biomarker studies addressing unmet needs across the lung cancer care pathway.
- KOL Management & Expert Insights:** Built and maintained a core lung cancer KOL network; collected clinical needs and evidence gaps through expert visits, advisory boards and investigator meetings, and translated them into medical strategy and research priorities.
- Product Evidence Generation:** Led IIT and real-world study design based on clinical needs and product evidence gaps, supporting pre-market registration evidence generation and post-launch expansion of use scenarios.
- Scientific Intelligence & Medical Interpretation:** Tracked ELCC, ASCO, WCLC and ESMO updates, key clinical trials and multi-omics studies; developed medical interpretations, competitive intelligence and expert communication materials.
- Multicenter Study Management:** Led protocol, CRF and SAP development; managed multicenter studies, CROs and vendors, including site initiation, patient enrollment, sample/follow-up management, data quality, medical Q&A and issue resolution.

### ChosenMed Technology | MSL Manager | Mar 2021–Aug 2023 | Reports to Senior Medical Director

- Regional Medical Affairs Management:** Managed oncology Medical Affairs and KOL engagement across Shanghai, Jiangsu and Zhejiang; developed regional expert coverage and scientific communication plans.
- Clinical Insights & Expert Engagement:** Collected clinical needs, testing-related questions and expert feedback through KOL visits, case discussions and scientific meetings to support medical strategy and product optimization.
- Research Collaboration & Project Execution:** Supported regional research collaborations, including project discussion, protocol refinement, site communication and execution follow-up.
- Internal Medical Support:** Delivered disease, testing technology and clinical evidence training to sales, product and marketing teams to improve cross-functional scientific alignment.

### Rightongene Biotechnology | Medical Advisor | Jan 2020–Mar 2021 | Reports to Medical Director

- Regional KOL Medical Support:** Maintained expert relationships and scientific communication in Zhejiang, Anhui, Jiangxi and other regions, building a foundation for clinical collaboration.
- Clinical Needs & Project Design:** Collected testing needs and research collaboration opportunities; contributed to study design, case/sample information collection and project tracking.
- Project Coordination & Issue Resolution:** Coordinated investigators and internal teams to support study execution and resolve medical questions related to testing applications and research implementation.
- Sales Training & Scientific Communication:** Delivered regular training on disease areas, testing technologies and clinical applications to support accurate medical communication by sales teams.

## Selected Projects & Publications

### Selected project: National Multicenter Translational MRD Study in Driver-Mutant NSCLC

Leveraging driver alterations as truncal oncogenic events in lung cancer, this study explored the feasibility of a driver gene-guided liquid biopsy strategy for postoperative recurrence monitoring and MRD assessment. Conducted with 14 clinical centers nationwide, the study covered protocol design, site enrollment, sample testing, follow-up and data analysis, generating key pre-market clinical evidence for the company's MRD product. Interim results were accepted as an oral presentation at ESMO Asia 2025.
